Installation Procedure

1. Excavate foundation holes as shown on sheet 2. When installing into loose surfaces such as sand, install the unit 100mm lower into the ground to allow for surfacing loss over time.
2. Position each post into the foundation holes, check the posts are plumb. Add concrete around posts. The top of the concrete should be 100mm below the finished surface level, see sheet 2.
4. Leave the concrete to set for 48 hours.
5. If stepping, butting, or overlapping any other equipment ensure there is a gap of less than 8mm or greater than 30mm. It may be necessary to cut the beams to achieve this. (Re-treat cuts with appropriate non CCA preservative)
6. Sand and rough edges or surfaces and treat with preservative if necessary.
7. This unit must be maintained in accordance with our inspection and maintenance schedule and BS1176 part 7.
